

HOSPITAL STRONG

SCHOOL SAFE.

Made in the USA

ABOUT US

We are a team of thought leaders and innovators passionate about shaping a new paradigm of cleaning through science-backed products. Our products are intentionally made to promote health and sustainability. The main ingredient in all of our products is hypochlorous acid (HOCl), derived from salt minerals and water. HOCl is a compound produced naturally by the human body as part of our immune system and is pH neutral, which causes less irritation than traditional cleaning products. Our chemists replicate this compound by running an electrical charge through a combination of salt and water. The power of clean is in the science and chemistry, not synthetic chemicals. You have HOCl in your own body to help it fight infection on the inside, and now you have HOCl in Clean Republic to fight from the outside, all without having to sacrifice the integrity of a clean environment or the health of those you care for.

#WeAreInThisTogether

THE CLEAN REPUBLIC WAY

Safety Matters.

The way in which you clean and disinfect to protect your employees, contractors, and students are of the utmost importance.

Cleaning and Disinfecting Intentionally

When you partner with Clean Republic you are aligning yourself with a partner who believes you shouldn't have to choose between a clean environment and harmful chemicals. You're aligning yourself with a company who believes in giving back locally and globally, and a company who believes that by protecting our planet we're creating a happier, healthier future for *everyone*.

Protecting public health with science.

Clean Republic provides public health and green clean cleaning solutions to handle infectious disease situations. We are uniquely qualified to help your facility implement a perfect system to maintain public health because our solutions were crafted alongside the national experts in the science and technology of cleaning and disinfecting. Our products are made with hypochlorous acid (or HOCl), which is the infection fighting compound found naturally in the human body and replicated by scientists by running an electrical charge through a combination of salt and water. It's nature in its purest form, backed by scientific evidence.

THE SECRET SAUCE

Forget synthetic chemicals and say farewell to toxic fumes. Our process only requires **salt, water, and electricity** to produce hypochlorous acid (or HOCl), the main ingredient found in Clean Republic. The challenge with HOCl has always been in stabilizing the solution to make it commercially viable. It took a decade of research and development, but our chemists discovered how to do this without using any additives which would jeopardize the purity of the product. It's nature at its purest combined with scientific evidence.

We offer commercial and retail grade sanitizers and disinfectants, and powerful everyday all-purpose cleaners. All of our solutions are eco-friendly, less toxic and sustainable.

HOSPITAL STRONG. HOME SAFE.

DISINFECTANT + SANITIZER

Clean Republic Disinfectant + Sanitizer is an EPA approved hospital grade disinfectant. Clean Republic Disinfectant + Sanitizer has demonstrated effectiveness against viruses similar to COVID-19 on hard, nonporous surfaces. Therefore, Clean Republic Disinfectant + Sanitizer can be used against COVID-19 when used in accordance with the directions for use against Norovirus and Rhinovirus type 16 on hard, non-porous surfaces.

- ★ COMMERCIAL GRADE
- ★ EPA APPROVED FOR HOSPITAL USE
- ★ EPA REGISTERED FOR USE AGAINST SARS-CoV-2
- ★ KILLS 99.99% OF BACTERIA + VIRUSES
- ★ NO HARSH CHEMICALS OR TOXIC FUMES
- ★ CATEGORY IV TOXICITY RATING

MEDICAL STRENGTH HAND CLEANSER

Your customers and team members will love our multitasking medical strength Hand Cleanser. This cleanser is eco-friendly, non-cytotoxic, alcohol-free and comes in a convenient credit card dispenser perfect for every pocket as well as in a touchless automatic dispenser option.

The all-star ingredient Hypochlorous Acid (HOCl) is an infection fighting compound found in the human body and naturally occurs in your white blood cells. HOCl helps to defend your body from harmful bacteria, viruses, and inflammation. Oxygen helps to stimulate the body's natural healing function and is vital for healthy skin.

This hand cleanser is non-irritating to skin and contains no steroids, triclosan or antibiotics.

BENEFITS:

- HOCl cleanses and purifies skin
- Oxygen + HOCl hydrates
- Credit card size is convenient + travel friendly

CLEAN WITH CONFIDENCE

Here is what a few teachers have to say about using Clean Republic.

“ I keep CR by the front door, in the kitchen and in my car. I am able to easily grab it to spray down anything and everything that enters my house or car. It gives me peace of mind and allows me to cross those things off my mental load because I know that they are safe and disinfected. Although I am still unsure of what school will look like, I know that I will have CR in my arsenal to disinfect my tables and supplies quickly and efficiently. I rest easy knowing that my school family and my own family will have another layer of protection because of CR. - Cortney Bonner | Art Teacher | Richardson, Texas

“ As a middle school science teacher, lab protocol and safety is a necessity. Through building productive habits of mind and action my students are empowered to solve the problems of today and to find the solutions for tomorrow. Using clean republic on all of my science surfaces gives me piece of mind. When I know that I can welcome every student into a classroom that is sanitary and set for their success, I can focus on their social-emotional development and truly teach. - Spencer Brown | Science Teacher | Los Angeles, California

“ Keeping a clean music studio has always been a top priority at Coletrain Music Academy, however now with the many added safety concerns around Coronavirus, it was imperative that we upped our cleaning requirements. We have a Clean Republic touchless hand dispenser at the entrance of our school requiring everyone to use at entering and exiting. We keep the disinfectant on our reception desk and use it after each student on high-contact surfaces (doorknobs, waiting room chairs, books, pencils and music stands). I love knowing that it kills viruses and bacteria without the harmful side-effects. - Coleman Smith | Music Teacher | Buena Vista, Colorado

WHY CLEAN REPUBLIC?

- Despite COVID-19, it's critically important to clean and disinfect. However, it is almost equally important to be conscious of what you are cleaning with. Especially in the classroom and areas where students gather. The last thing you want to do is solve one health problem, only to cause another.
- The current environment requires us to use pure chemistry rather than synthetic chemicals to maintain our health and those of our employees and students.
- Restoring confidence in teachers, students and their families by using Clean Republic products is essential to restoring overall confidence in the traditional school system.
- Clean Republic not only provides the solutions to clean and disinfect with, it also lends the expertise and sophistication to show you how to use those solutions.
- Clean Republic chose to brand and market a solution that was historically used by healthcare workers. However, in many ways, it is the answer to the problems that we are all faced with today. Institutions and organizations occupied by the most vulnerable of our population, especially, must be forward-thinking and clean intentionally and responsibly.
- OMRI has reviewed Clean Republic Disinfectant + Sanitizer Ready To Use for Hard Non-Porous Surfaces (crc-14429) and has determined that it is Allowed With Restrictions for use in compliance with the USDA National Organic Program.

WHY NOT GIVE YOUR FACULTY A CLEANER WAY TO CLEAN?

I look forward to working with you.
